

This ruling is well intended (to prevent people from receiving unwanted faxes). Unfortunately, as written, I am concerned that it will cause much discontent amongst our members when THEY ASK US fax them something (e.g., an invoice or receipt). The FCC's definition of "unsolicited fax" is not a reasonable definition. "Unsolicited" should mean "not requested"--period. If a member asks us to fax them something & we do so, chances of a complaint are slim to none.
